at IDS 2019, Cologne

Implant dentistry from A to X

NEW: Azento Single tooth replacement—Outstanding flow. Great results.

NEW: Acuris Conometric concept—Retention redefined.

Live demonstrations, hands-on experience, professional discussions

Hall 11.2, Booth K-030

Implant dentistry from A to X

Our comprehensive solutions for all phases of implant dentistry create value for dental professionals and allow for predictable and lasting implant treatment outcomes, resulting in enhanced quality of life for patients.

Implant systems

Our world-class implant systems, based on a solid foundation of clinical documentation, have their own unique benefits and deliver exceptional, long-term, esthetic results. Ankylos is the engineered solution merging restorative simplicity with predictable, natural esthetics. Astra Tech Implant System, designed for CAD/CAM technologies, offers tailor-made solutions and restorative ease. Xive is smart, intuitive and flexible, offering superior primary implant stability.

Digital planning

Our Simplant digital treatment planning platform and service for guided surgery ensures accuracy in planning and execution of the implant treatment. It is compatible with all major implant brands, giving you the freedom to use your preferred implant system.

Regenerative solutions

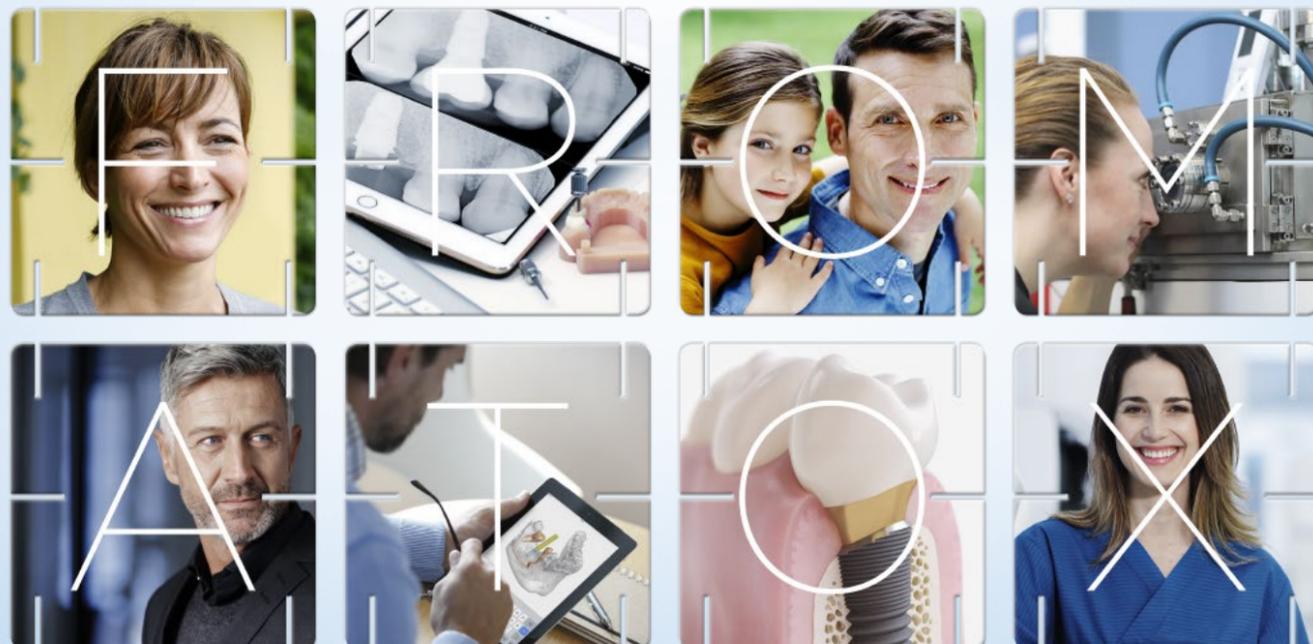

Our Symbios portfolio for hard and soft tissue regeneration provides ease of use and safety for predictable, long-term outcomes. The solutions promote bone formation, volume and stability and include bone graft materials, resorbable and non-resorbable membranes, and instruments.

Restorative solutions

Our Atlantis patient-specific restorative solutions, including abutments and suprastructures, meet patient requirements by utilizing state-of-the-art digital technology to mimic natural tooth function and esthetics. The solutions are available for all major implant systems, giving you the freedom of choice.

Professional and business development

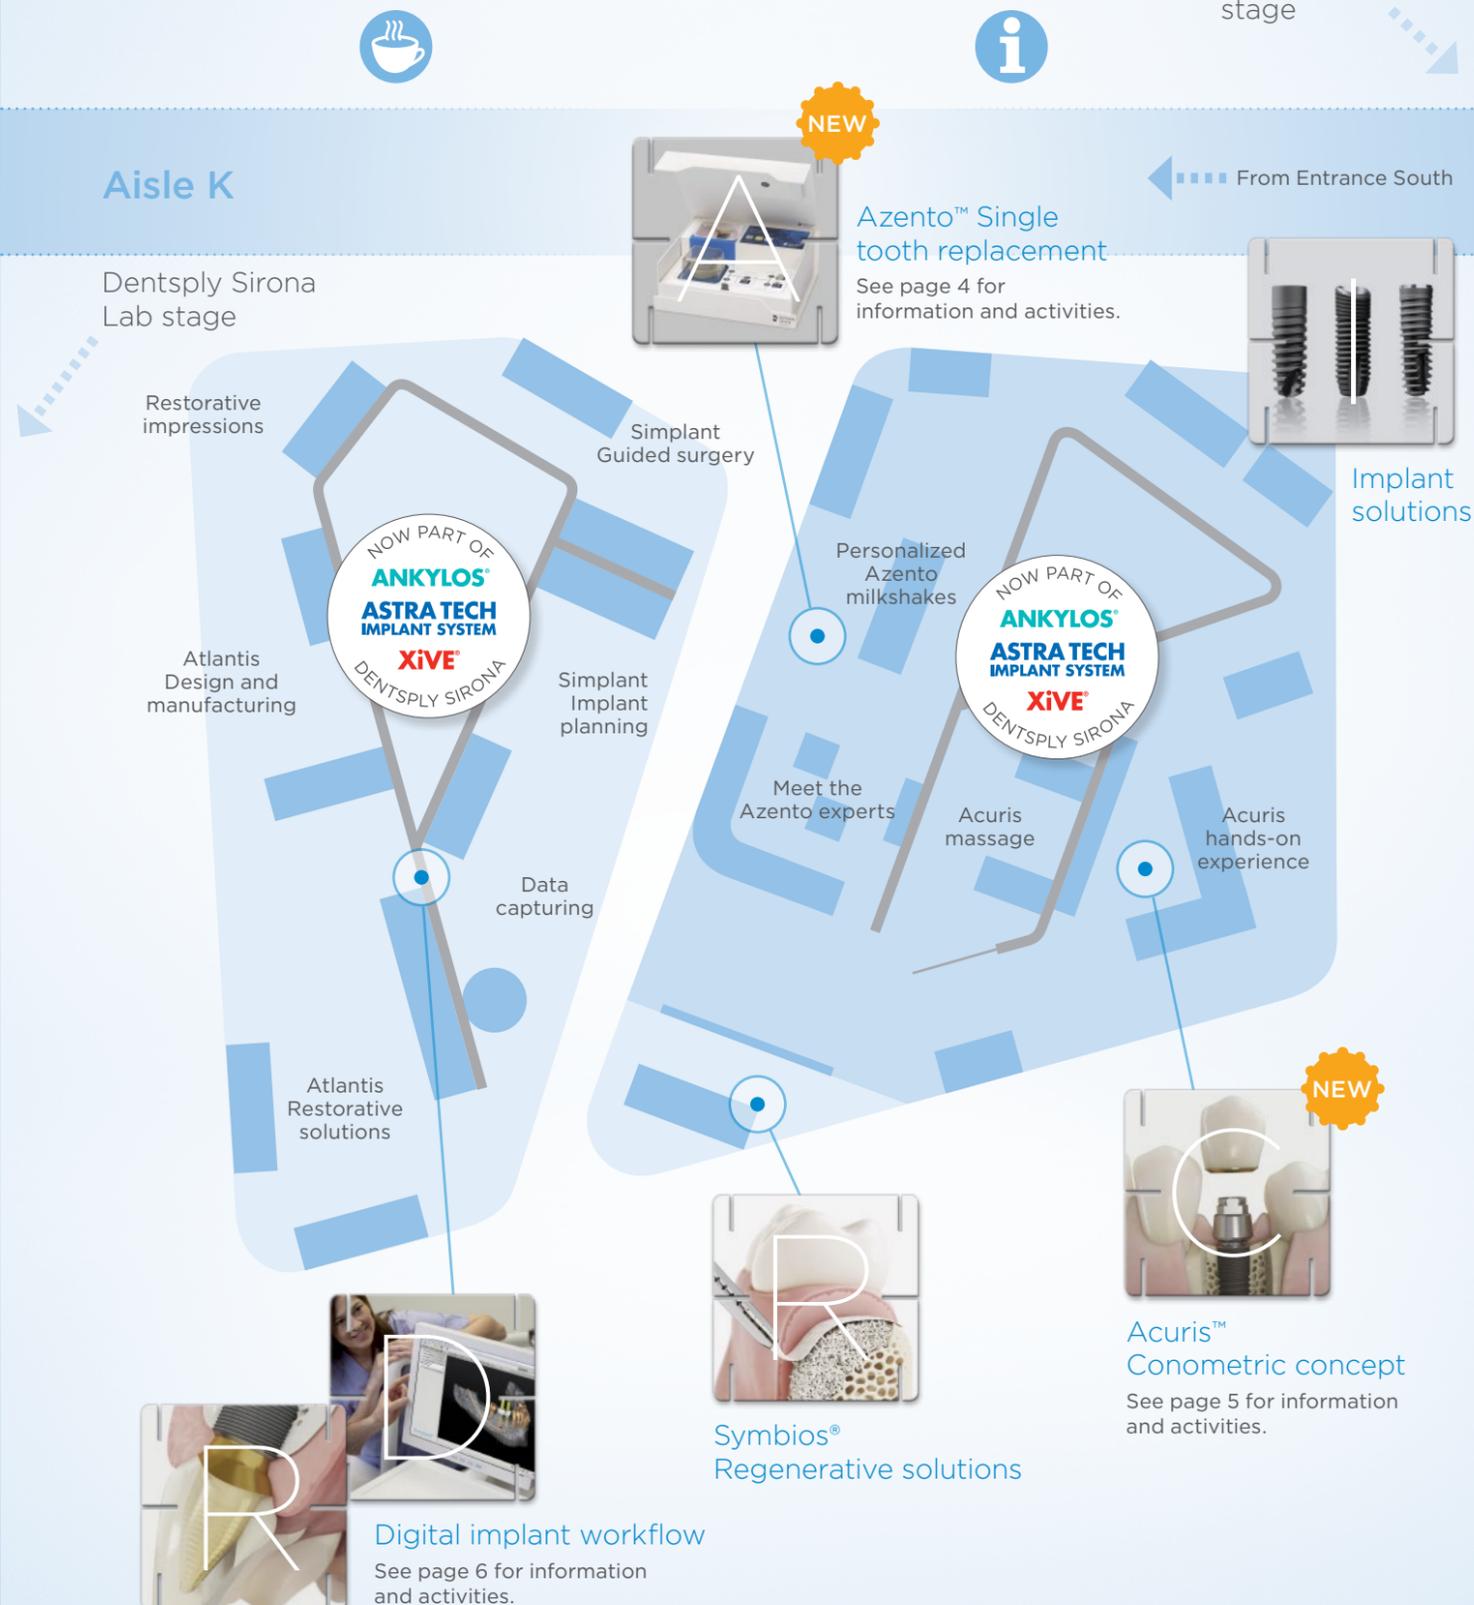

We offer world-class educational programs for all members of the treatment team, and marketing tools and services to support the continued development of the dental laboratory and implant portion of the practice.

Meet Dentsply Sirona Implants

Hall 11.2, Booth K-030

Dentsply Sirona stage

Azento™ Single tooth replacement

Azento is an innovative solution for single tooth replacement that offers tangible financial and time-saving benefits while enabling practices to achieve consistently excellent results.

- The clinician receives a precise, customized digital treatment plan based on each patient's digital scans.
- The Azento box includes all components and instruments necessary to complete an implant treatment.
- Implant planning, purchasing and delivery are streamlined.
- The benefits for the patients include reduced number of visits and shorter chairtime.

Acuris™ Conometric concept

Acuris is a major breakthrough in implant dentistry as the solution redefines retention. This innovation truly represents the best of two worlds: a retention that is removable for the dentist but fixed for the patient.

- A conometric concept that uses friction instead of a screw or cement.
- The procedure is easier to perform and the placement of the crown takes seconds rather than minutes with the unique Fixation Tool.
- Without screws and cement, you'll see improved esthetics, without any visible screw access holes and less risk of biological complications.
- A fixed crown for the patient, but the dentist can retrieve it if needed.
- Abutments with different angulations are available for all three implant systems and for all positions in the mouth.

Experience Azento™ at IDS 2019

Dr. Mischa Krebs

Daniel Butterman, DDS

Outstanding flow. Great results. Azento—streamlined implant treatment.

Listen to clinicians presenting clinical experience with Azento on stage and learn how to benefit from this streamlined implant treatment.

Digital implant workflow

From data capturing, planning and guided surgery to the final restorative solution—follow the digital implant workflow from Dentsply Sirona at IDS and learn how to easily connect all areas in your clinic and with your preferred dental laboratory, save time, grow your business and provide patients with the best possible care.

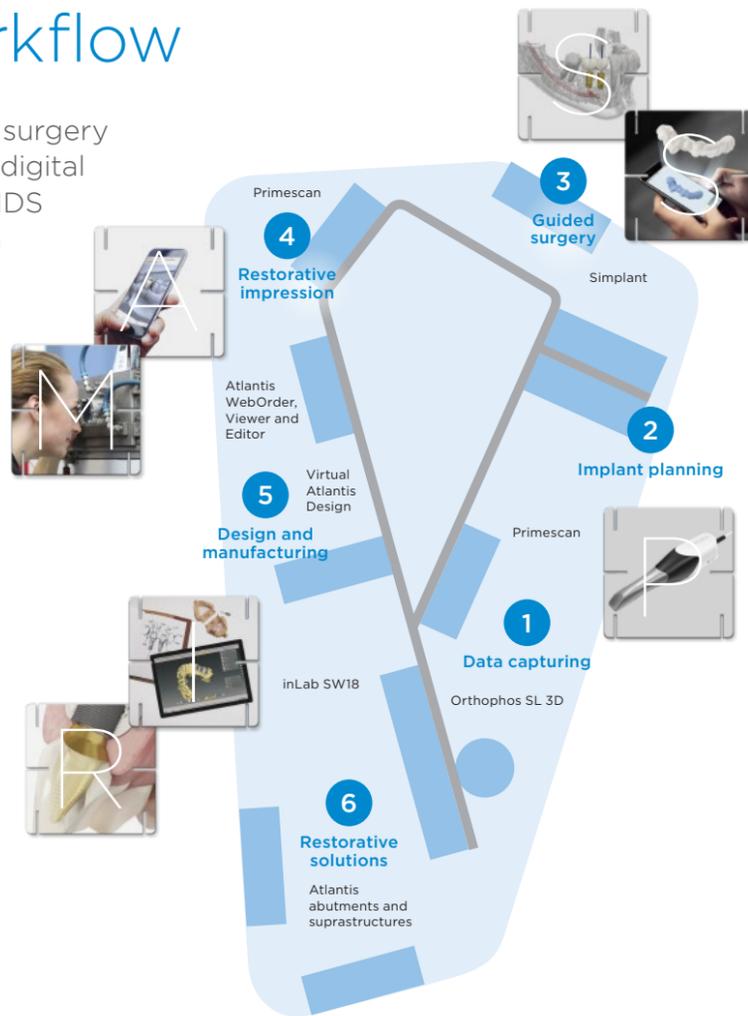

1 | Data capturing Effective collaboration starts with 3D imaging: A CBCT scan with Orthophos SL 3D combined with an intraoral scan using Primescan provide the optimal start for efficient and flexible digital planning of implant restorations.

2 | Implant planning Virtually plan your implant case, considering prosthetic requirements and determine anatomical and bone quality prerequisites. Save time using mySimplant planning service or plan in your clinic with Simplant Pro software.

3 | Guided surgery Transfer your virtual planning to a surgical guide with accuracy. Order your Simplant Guide at Dentsply Sirona or print it in the clinic using a 3D-printer and Simplant Guide File.

4 | Restorative impression Enjoy seamless collaboration with dental laboratories using any major intraoral scanner. With Primescan intraoral scanning is now more accurate, faster and easier than ever before.

5 | Design and manufacturing Dentsply Sirona offer the latest in world-class manufacturing technology. Atlantis patient-specific solutions are virtually designed and manufactured according to your exact preferences. Conveniently review and edit your restoration using Atlantis Viewer.

6 | Restorative solutions Receive your Atlantis patient-specific solution and finalize your restoration to replicate natural esthetics and return your patient's individuality. Design the crown for the abutment using inLab software and verify your digital patient files using Atlantis Printed Model.

More highlights and innovations from our comprehensive solutions portfolio for implant dentistry from A to X

Xive® implant system

A new curve is the straight line to better results. Updated Gingiva Formers and Impression Copings add convenience in the daily routine and provide improved esthetics.

Simplant® Guide File

Access the digital workflow on your terms for restorative and implant planning and guided surgery for your choice of implant system. Easily order Simplant Guides directly from Dentsply Sirona or new at IDS, download Simplant Guide File for guide fabrication in the clinic.

Implant 900

The new Implant 900 surgical unit is your reliable partner in implant dentistry and oral surgery—efficient and easy to operate.

Atlantis® Printed Model

Transform your intraoral scan into printed reality. Atlantis Printed Model is easily ordered at the same time as your Atlantis patient-specific solution when using intraoral scanning. Available for all Atlantis abutments, restoration types and your choice of implant system.

Symbios® Algipore®

Algipore, a proven natural phycograft material originating from calcifying red algae, documented and in clinical use since 30 years.

Atlantis® solutions via inLab SW 18

With inLab SW 18 connecting to our world-class Atlantis patient-specific solutions becomes easier. As an intuitive, integrated solution, inLab SW 18 aims for streamlining the laboratory workflow.

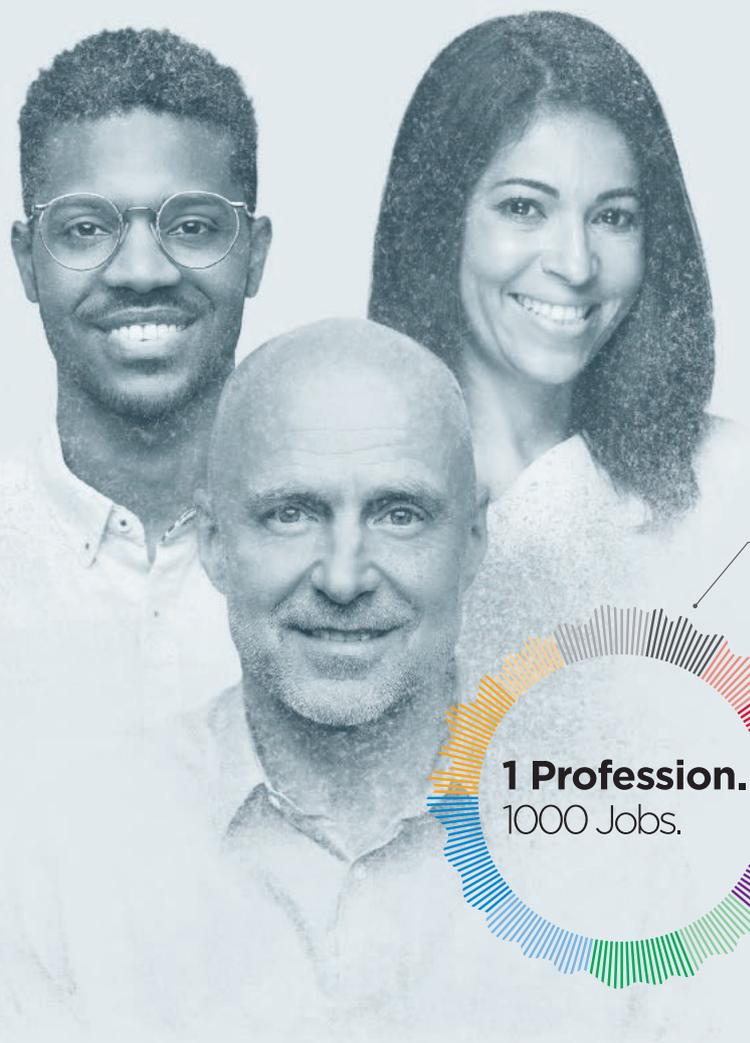

Symbios® Collagen Membrane pre-hydrated

The first unique, predictable and pre-hydrated regenerative solution consisting of purified intact collagen tissue derived from bovine pericardium.

Primescan

An excellent choice for outstanding results: Primescan is your perfect starting point into digital dentistry. No matter how you would like to design your workflows, Primescan is the enabler for efficient digital workflows—both, chairside in your practice and with your preferred partners. With Primescan intraoral scanning is now more accurate, faster and easier than ever.

Inspired by your needs.
